

In order for our democracy to survive, we must have a free exchange of ideas and all voices must be heard. Sinclair Broadcasting's recent decision to force all of its 62 stations to air the same political program demonstrates how much damage the FCC-constructed media system is doing to our democracy. It is time to put an end to the hyper-consolidated corporate media structure. We need to hear independent voices, local voices, and voices from outside the Republican and Democratic parties. Please take action to make these voices heard. Our democracy depends on you.
